

Plückhahn

PASSENGER SHIP DEPARTURE INDEXES

For passengers leaving Germany on Ships there are currently **3** different indexes one can search for records. The first index is what is called the **Direct Index**. This indexes individuals that sailed directly from a German port to its destination. The **InDirect Index**, lists individuals who sailed from Germany with a stop before arriving at its final destination. Even though these are indexes, there is a different index for each year. Therefore if you don't know the year that your ancestor departed Germany, it could take you sometime to find them. The other index is called the **15-Year Direct Index**. It covers the years **1856-1871**. This is a good place to start, and that is what we did. The only Plückhahn found in this index was for Johann Plückhahn, founder of the Appleton Branch. We are now slowly but surely going through the direct and Indirect Index, but we need your help.

Index for German Departures that were direct from Germany. (Direct Lists)

These Microfilms can be found at the Family History Centers, and at the branches of the National Archives.
